

Patent
Attorney Docket: LYNN/0122

IN THE CLAIMS:

Please amend claims 1 and 11 and cancel claims 6 and 12 according to the following replacement claim set:

1. (Currently Amended) A method for demolishing concrete that is reinforced by an iron-containing member comprising:
 - disposing a counter electrode in electroosmotic communication with an exposed surface of the concrete;
 - coupling the terminals of a power supply to an exposed portion of the iron-containing member and the counter electrode; and
 - applying ~~[[an]]~~ a constant electrical potential between the iron-containing member and the counter electrode; and
 - alternating the polarity of the constant electrical potential being applied between the iron-containing member and the counter electrode.
2. (Original) The method of claim 1, further comprising:
 - supplying an electrolyte solution to the surface of the concrete. (or maybe instead, bring this one up to claim 1 depending on what the JP publication actually discloses in a good translation.)
3. (Original) The method of claim 1, wherein the counter electrode is an iridium-coated titanium mesh.
4. (Original) The method of claim 1, wherein the counter electrode comprises iron.
5. (Original) The method of claim 1, further comprising:
 - varying the amount of current supplied from the power supply.
6. (Cancelled)
7. (Original) The method of claim 1, wherein the counter electrode is not disposed within the

concrete.

8. (Original) The method of claim 7, wherein the counter electrode is disposed only on the surface of the concrete.

9. (Original) The method of claim 8, further comprising:
supplying an electrolyte solution to the surface of the concrete.

10. (Original) The method of claim 8, wherein the counter electrode is a metal screen.

11. (Currently Amended) The method of claim [[1]] 8, further comprising:
varying the amount of current supplied from the power supply.

12. (Cancelled)
